

How To: H8W Quadcopter Companion App setup

Step 1

Visit the Google Play Store or Apple App Store on your smartphone or tablet.

Step 2

Search for the HT-wifi app then download and install to your device.

Step 3

Turn on the Quadcopter.

Step 4

On your device, go to WiFi settings and connect to the network “WiFiUFO”.

Step 5

Launch the HT-wifi app and connect to the Quadcopter.

Note:

The Quadcopter broadcasts a Wifi hotspot and your device will need to be connected so that the companion app can display the live video feed.

That's it! You're all done.

Support Notes

If you're using an Android device use the link below to view the companion app.
